

Reporting Principles

Mirka publishes its Sustainability Report every two years. This report is for corporate sustainability in 2017–2018 and the information in the report is collected from all units that are under direct control of Mirka Ltd, unless otherwise specified. In addition to the Sustainability Report, Mirka publishes its annual review including the most significant financial indicators as part of the KWH Group Ltd's Annual Report.

Mirka's Sustainability Report 2018 is a GRI Standards 2018 referenced report (for more details see Content index). The reported topics

and indicators have been selected based on their business significance, impact and stakeholder expectations and needs. We have also made a cross-reference to the United Nation's Sustainable Development Goals.

The reported indicators and topics provide our stakeholders extensive and reliable information for assessment and a transparent picture of Mirka's economic, social and environmental responsibility. We want to present our information in a comprehensive, clear and understandable way. Our goal is to provide an objective overview of our

operations rather than only focus on positive developments. Where possible, we have reported the information from the current and previous periods for comparison purposes. Our Board of Directors has approved this publication and confirmed that the presented information is accurate and verifiable.
